

VINYL

Swing Sets & Playhouses

Children love to play. They love to run, climb, slide, jump and swing. Nobody knows that better than Backyard Playstations. We create swings, gymsets and playhouses to fit the needs of any child and every family, with custom designs and features. With so many accessories and designs to choose from, your playstation can be created by you, for you, or simply pick one of the models in the catalog. Check out pages 30-31 to view our customized options.

Backyard Playstations has been making back yards more fun for more than 20 years as a family business. Our work is marked by exceptional quality and workmanship.

The structural timbers used in our sets are quality selected from exterior-use pine and covered with a vinyl sleeve. Hardware is plated to resist rusting, and swing bearings are made of nylon for a long, "quiet" life. Also, sliding boards are made of durable plastic for safety, comfort and quality.

Backyard Playstations' swingsets and playhouses are not only built of quality materials, but they are built well. Wider bases prevent units from tipping over, and each set is engineered and built with your child's safety in mind.

WHY VINYL AND WHAT IS IT?

Our vinyl swing sets are composed of a vinyl sleeve (the same material used for vinyl fences) then a piece of lumber is inserted into the vinyl sleeve to give it structural strength.

ROT RESISTANCE

The lumber that we use for the insert is ground contact pressure treated southern yellow pine (see: www.Wolmanized.com) to resist rotting and decaying. Our decks and railing are made from a high density cellular pvc

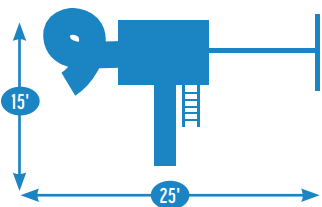

product that resists moisture, mold and mildew. It is almost immune to rotting, splitting and cracking.

MAINTENANCE

The best part of a vinyl swing set is that no maintenance is needed once the swing set is assembled. The materials will not crack, peel or fade. The only maintenance needed is when you would like to wash off dirt or pollen. Just use warm soapy water and it will be clean as new.

SAFETY

Vinyl swing sets also have many safety advantages. They do not chip or crack which means no splinters. Also, because no wood is exposed, wasps and bees will not nest in them.

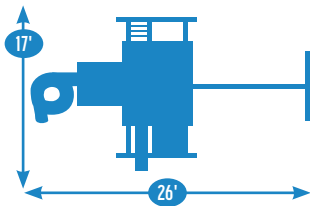

MODEL 220 On Cover

- 4' x 8' A-Frame Tower
- 5' & 7' High Decks
- Poly Roof
- 3-Position Single Swing Beam
- 10' Waterfall Slide
